Kelly,

Attached is a copy of today's Community Liaison report. I summarized some of the needs below.

Thanks,
Ronnie

Galveston County

- Need a HHW Collection/Drop Off

Wharton County

- Wharton Co has started collecting debris to a transfer station, but there seems to be no debris separation. No HHW is being separated from the other debris.
- Most Homes have large piles of debris at the street and are not sorted.
- Wharton has an approved debris staging area and will begin debris removal, however, sorting of debris is not clear

Jasper/Newton Area

- The locals are concerned that debris removal and reimbursement will take too long in rural areas
- HHW and debris collection is a serious issue, but there doesn't seem to be a clear answer that is getting to the affected counties

Galveston County

- Immediate need for the collection of HHW – drop off points. A resource that was provided during Ike.
- If a HHW drop off is established, recommended placing in the following cities: Friendswood, League City, Santa Fe, Dickinson, and Baycliff
- Some concern raised about collection points because individuals lost their vehicles in the flood.
- Immediate need for debris collection
- Concerns regarding asbestos
